Question & Discussion

The "Why"

Social Determinants of Health

Getting Further Faster

Through multisector community partnerships GFF works to address one or more of the 5 SDOH areas:

- Built environment
- **©** Community-clinical linkages
- Food and nutrition security
- Social connectedness
- Tobacco-free policies

SDOH Key Area Built Environment Ommunity-Clinical Linkages Food & Nutrition Security Social Connectedness Tobacco-Free Policy Multiple

Year 1 Recipients

SDOH Key Area Built Environment Ochmunity-Clinical Linkages Food & Nutrition Security Social Connectedness Tobacco-Free Policy Multiple

Year 2 Recipients

Year 2 Evaluation Approach

Engage in discussions with key partners and staff to gather practice-based insights

Rapid Retrospective Evaluation

Conduct Prevention Impacts Simulation Model (PRISM) and cost analyses Review documents shared by MCPs to abstract and summarize outcomes data

Year 2 Key Results & Insights

All 14 Year 2 GFF partnerships helped build community capacity for addressing SDOH through new or strengthened partnerships, data and data systems, or strategic plans; leveraged resources; or engaged residents. All partnerships collaborated with local or state health departments, and half of the Year 2 MCPs collaborated with both local and state health departments.

Most Year 2 GFF partnerships (86%) reported health outcomes data for their SDOH initiatives, including improved health behaviors, clinical outcomes, and overall health and wellness, and decreased health care utilization.

Thirteen Year 2 GFF partnerships contributed to community changes that promote healthy living, such as building new hiking trails, bike lanes, and playgrounds; restoring parks and other community gathering spaces; and adopting tobacco-free policies.

Year 2 GFF partnerships shared several keys to sustaining multi-sector community partnerships (MCPs) focused on SDOH:

- Good communication is important for sustaining MCPs
- Shared expectations, vision, and goals
- A team-based, decentralized structure
- Sustained funding

Sustaining MCPs

Health Departments provide:

- Technical Assistance (TA)
- Funding
- Resource support to multi-sector community partnerships (MCPs)
- Health Departments are connectors
- Health Departments provide staffing support and tangible resources for SDOH initiatives

Collaboration with Health Departments

Collaboration with Health Care Delivery Systems

Health care partners support multi-sector community partnerships (MCPs) and their SDOH initiatives by providing:

- Health and SDOH screenings to help connect people to service providers in their communities
- Training and TA, including assistance assessing the impact of SDOH initiatives
- Staffing support, such as serving on the partnerships board or volunteering at community health fairs
- Tangible resources, including funding and workspaces

Cost & Potential Long-Term Impact

- Based on costs data provided by Year 2 GFF partnerships, annual operating costs across the 13 multi-sector community partnerships (MCPs) total about \$7.4 million.
 - Excluding one intervention's large expenditure on contracted services, about 53% of total annual operating costs were for labor
- For the Year 2 GFF cohort, median annual cost per person reached ranged from \$12 for smoke-free multiunit housing interventions to \$91 for interventions to increase access to fruits and vegetables.

Training and Technical Assistance – Year 2

Virtual TTA events

- Peer-learning workshops for Year 2 GFF coalitions
- Community of Practice series for Year 1 and 2 GFF coalitions
- Two-part didactic webinar on building a business case for addressing SDOH

One-to-one coaching

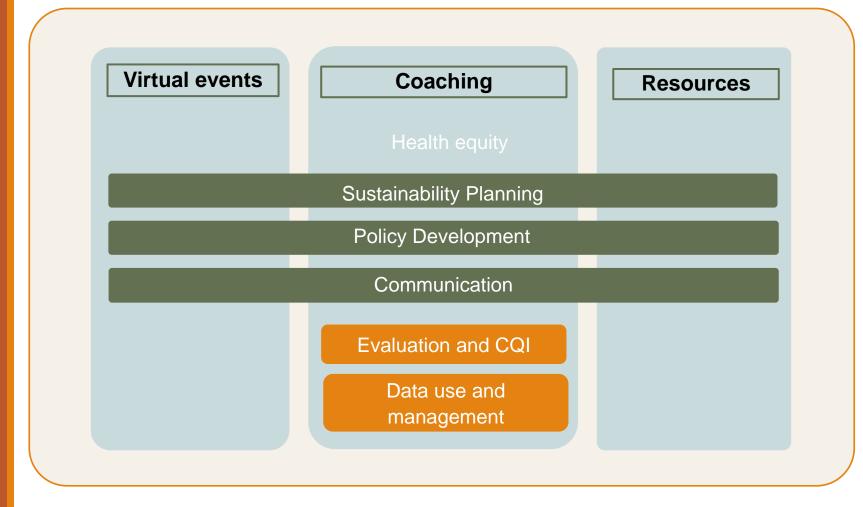

- Individualized support with assigned coaching team for consistency
- Co-development of coalition-specific learning goals
- Ongoing, monthly engagement
- Facilitated peer matching

Tailored resources

- Co-development of customizable, SDOHspecific sustainability and policy development guides and templates for strategic action planning
- Sharing of existing resources

Training and Technical Assistance topics by modality

Policy Planning Guide & Template

Figure I.1. Policy process framework

- Module I Introduction
- Module II Prioritization Exercise
- Module III Policy Partner Engagement
- Module IV Problem Identification
- Module V Policy Analysis
- Module VI Strategy and Policy Development
- Module VII Policy Enactment
- Module VIII Policy Implementation
- Module IX Evaluation

Sustainability Domains

- -Community and organizational partnerships
- -Funding
- -Governance
- -Staffing
- Ongoing assessment and continuous quality improvement
- -Strategic communications
- -Policy

Sustainability Planning Guide

Future Training & Technical Assistance (TTA) Recommendations

Continue TTA to strengthen capacity and sustainability

 Invest in additional TTA to support ROI strategies, policy development

Support implementation of policy and sustainability plans

 Provide ongoing TTA for evolving policy and sustainability activities

Invest in custom resources

 Invest in the development of future co-designed resources

Allocate and fund time for one-to-one coaching

 Continue to require 1:1 coaching with flexibility to support coalitions-specific needs

Provide opportunities for peer connection

- Promote ongoing forums for formal and informal peer learning
- Consider creating shared coalition profiles

Extend the TTA period

 Lengthen the period of TTA delivery to 12 months to allow more time for planning and implementation

Communications

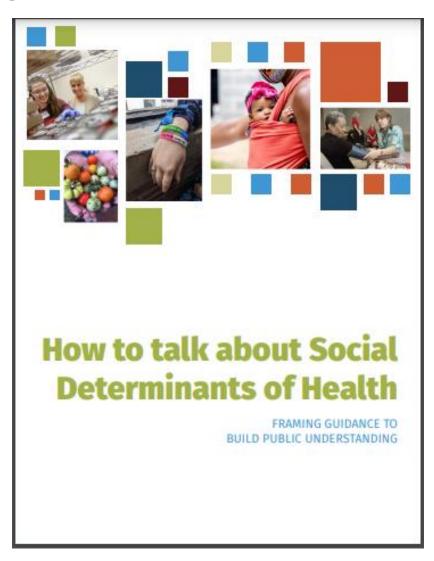

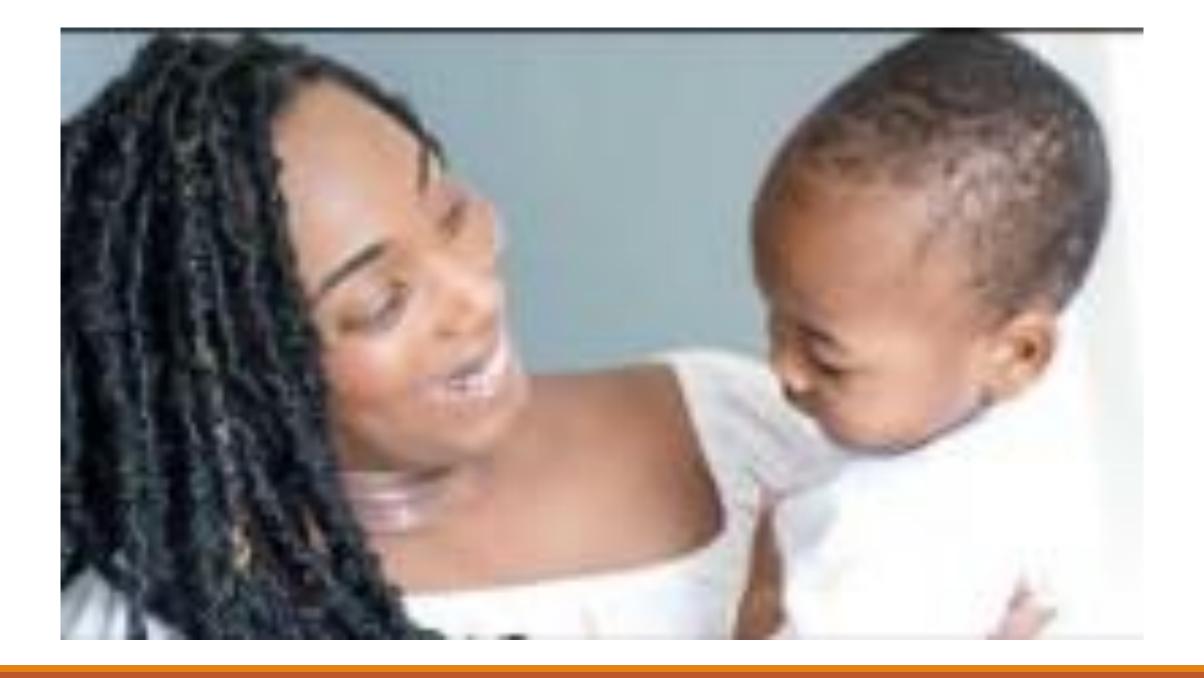

SDOH Framing Guide

Getting Further Faster

What's Next?

- Development of Community of practice open to the public.
- Disseminate findings more broadly including:
 - Results of the year 2 evaluation
 - Tools and resources to support other communities to develop and implement strategies to address SDOH
- Development of series of case studies examining how non-profit hospitals, health departments and human services organizations work together to address SDOH

Thank You!

Discussion Questions

Does your project currently collect health outcomes data? What are your challenges here?

• What types of training or technical assistance would you like to advance your SDOH work?

• What challenges have you experienced with advancing SDOH programs and policies?

THANK

YOU
